FIELDS OF APPLICATION

Since 1987

Italtronic has specialized in the production of enclosures for industrial electronics and home automation.

It offers customizable products, innovative solutions, and premium material quality.

Made in Italy.

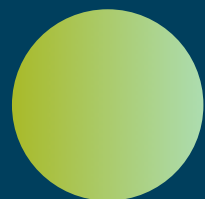

Italtronic part of the Perdieci Holding

Growth and Cross-Functional Management

In 2018, Italtronic joined the **Perdieci Holding**, an Italian holding company specialized in industrial manufacturing, with a vision focused on sustainable growth and industrial integration across the group's companies.

The group promotes the sharing of resources, expertise, and knowledge among its companies, creating synergies for collective growth.

The diffusion of best practices and standardized processes optimizes resources and increases the companies' operational efficiency.

Cross-functional management enables a more effective response to challenges, through optimized resource allocation and a shared strategic vision.

Graphic Customisation

Quadrichromatic UV inkjet printing offers photo-quality results and flexibility for small production runs.

Laser printing uses light to alter the material's color, producing permanent monochrome prints even with very fine lines.

QR codes, barcodes, and serial numbers can also be printed.

Fasttronic is a fast-production service with guaranteed delivery in just 5 days from order, including graphic and mechanical customizations.

Quality at high speed.

3

Series

Included range

The service is available for Modulbox ONE, XTS, and COMPACT, with CNC machining and pre-approved digital prints.

100

pieces

Maximum processed capacity

Up to 100 processed pieces per order, including a combination of panels and enclosures in the same kit.

5

days

Guaranteed shipping

The confirmed order enters a dedicated production lane and ships within five business days.

Fields of application

We are **present wherever it is necessary** to protect a network, an electronic system, and its connections inside a building or a home.

In other words, **we enclose applications** across industrial automation and home automation, remote control, lighting, and many other fields.

Industrial automation

Home automation
